

المهمة الثانية في مسار الهندسة الصناعية

The second project "Industrial Engineering "

المتدرب : عبد الحكيم محمد ناعس

(Project management framework)

We have two methods for doing a framework:

The first one is Waterfall and the second one is SCRUM, right now we are using the first one (waterfall), this method depends on 5 steps starting from:

- Requirements analysis:

About our robot we need to:

Holding a sword.

calculate a sword weight.

moving an arm 360 degree.

Najd dance.

- Design:
We done a hand sketch for a sword

- Testing:

Wywtirwnsr\$w}wxig \$jvsq \$i iglermep\$rkmiivrk\$
